

Dear Parent/Carers,

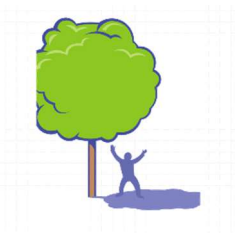

Next week, on both Monday and Tuesday, we are forecast weather around 35°C. In line with Department for Education guidance surrounding education settings in heatwaves, we be will taking precautionary measures inside school but please find key information for parents/carers below.

Pupils should have **sunscreen** applied before coming to school on Monday & Tuesday.

Pupils should bring a **refillable water bottle**, which can be refilled throughout the day.

As lunchtime is the sunniest part of the day, it may be the case that pupils are either asked to **stay in the shade** or **inside** for activities.

Pupils can come to school wearing non-uniform to enable children to wear **loose, light coloured clothing** that will help keep them as cool as possible. Appropriate clothing must be worn in school (e.g. no crop tops or very short shorts). It is important to be mindful of exposed skin in the sun.

There are a range of activities planned to celebrate the end of term and we are incredibly excited to share these with pupils on Monday & Tuesday. We thank you in advance for taking the above into account as pupils attend school next week.
